Thermal Transfer Solutions Ltd

// Sustainable Development Policy

Sustainable Development – definition *'development which meets the needs of the present without compromising the ability of future generations to meet their own needs'*

Thermal Transfer Solutions is a socially responsible company committed to economic success, combined with the need for social awareness. The increasing stress put on resources and environmental systems such as water, land and air cannot go on forever, as the world's population continues to increase.

Thermal Transfer Solutions is committed to growth through sustainable development, by ensuring:-

The processes involved in the manufacture of their products take account of precious resources.

Personnel are trained to understand the benefits of sustainable processes, which in turn impacts on their personal development and general knowledge of the environment.

Thermal Transfer Solutions supports the United Nations Global Compact and is following their set of core values with the introduction in 2009 of a continuous improvement plan aimed at :-

Reducing energy use by 3% over the next 2 years

Reducing CO2 emissions by 5% over next five years

Waste reduction of 3% per annum.

A recycling programme on all re-usable materials

Completion of ISEGA approval on all products supplied.

Maintaining the certification achieved in 2007 to ISO 9001:2000 for Internal Quality Management and ISO 14001:2004 for environmental management systems.

Building long and successful partnerships with both suppliers and customers, to ensure transparency and a business built on sound ethics.
